

KVH Industries – World-leading manufacturer of in-motion satellite TV antenna systems

KVH Industries has been bringing premium satellite TV service to mobile consumers since 1995. The company now supplies more in-motion satellite TV systems for the marine and land mobile markets than any other manufacturer in the world. Tens of thousands of boat, RV, and motorcoach owners enjoy digital-quality television programming thanks to KVH's family of award-winning TracVision antennas.

Marine Market

The maritime TracVision family offers a rugged design ideal for the demanding marine environment. These fully stabilized, DVB®-compatible systems provide unmatched satellite tracking and reception even in the face of the severe pitch, roll, and yaw experienced at sea. With antennas ranging in size from 18" to 32" in diameter, TracVision systems bring satellite TV aboard vessels of virtually any size.

Recreational Vehicle Market

For the RV and motorcoach enthusiast, KVH has developed an extensive line of domed antennas that offer outstanding reception both when the vehicle is stationary or on the move. Designed specifically for RVs and motorcoaches, the aerodynamic design sheds moisture, such as dew or rain, that can build up when the vehicle is parked. This ensures the best possible reception and signal strength, regardless of when and where you choose to watch TV.

Automotive Market

Now, KVH's innovation, quality, and technological leadership are being applied to the automotive market. The TracVision A5 represents an entirely new approach to in-motion satellite TV and has made live satellite TV in your car a reality.

Introducing

Live Satellite TV in your Car!

Satellite Television

KVH TracVision® A5

TVAS04adfold1_8.03

Get all of your **favorite satellite TV programming** while on the go!

TracVision A5 brings 300+ channels of live satellite TV and music to your car's entertainment system

Leave the DVDs and videotapes at home and instead enjoy live entertainment while you're on the go! KVH's new ultra-low profile TracVision A5 digital satellite TV antenna system delivers live satellite TV to your vehicle's video system as you drive down the open road anywhere in the U.S. This sleek new antenna is the first product that's designed specifically to bring the variety and excitement of live satellite TV to automobiles. Regardless of vehicle motion, TracVision A5 automatically finds and tracks your selected TV satellite and presents your favorite entertainment on your in-vehicle video system.

Traveling in your car has never been so much fun! Now your family can enjoy all of the digital satellite TV programs that they watch at home, in your car. Instead of "Are we there yet?" – the question you'll hear will be, "We're there already!"

Enjoy
Live Satellite TV
 on the **Go!**

Imagine surfing 300+ channels of your favorite programming from CNN,[™] Disney,[®] HBO,[®] ESPN,[®] MTV,[™] and hundreds of other channels on the open highway anytime, virtually anywhere!*

Deluxe Automotive Satellite Receiver –

Designed specifically to work with TracVision, this compact unit mounts out of the way under a seat, in a console, or in the trunk of your car.

Revolutionary and Durable Design –

Advanced hybrid phased-array antenna technology (patents pending) makes this remarkable low-profile system possible! The rugged impact- and weather-resistant antenna housing won't corrode and is built to withstand wind, weather, bugs, dirt, and most other road hazards.

Easy to Install –

The system simply attaches to most standard roof racks of SUVs, minivans, and luxury cars with tamper-resistant mounting hardware.

Includes 50+ Channels of Satellite Music –

Whether you enjoy classical, rock, jazz, blues, country, gospel, or the golden oldies, TracVision A5 delivers CD-quality, commercial-free digital music!

Fully Compatible –

Works with all standard in-vehicle passenger video displays.

Backlit RF/IR Remote Control –

The convenient, easy-to-use backlit remote control allows you to control the system from anywhere in your vehicle.

* TracVision A5 provides full in-motion reception of satellite TV signals on open roads with a clear view of the TV satellite in the southern sky. TracVision A5 is intended to provide programming for in-motion use and **only** on screens that are not directly or indirectly visible to the driver of the vehicle.

Satellite TV service sold separately.
